SENS

Meet the right people.
Make the connection count.

AI powered networking for real world events.

Discover relevant people, earn rewards for connecting and keep the conversattion going.

THE PROBLEM

Events are meant to bring people together

But who you meet is still left to chance

FINDING THE RIGHT PEOPLE

Nearly 1 in 2

younger professionals want curated recommendations on who to meet before an event.

STARTING THE CONVERSATION

40%

find networking awkward.

30%

struggle to start a conversation.

FOLLOWING UP

34%

of attendees say post event follow up often produces no meaningful outcome.

FOR ORGANISERS

STAYING ENGAGED

42%

of organisers report low or very low engagement with networking features.

PROVING THE VALUE

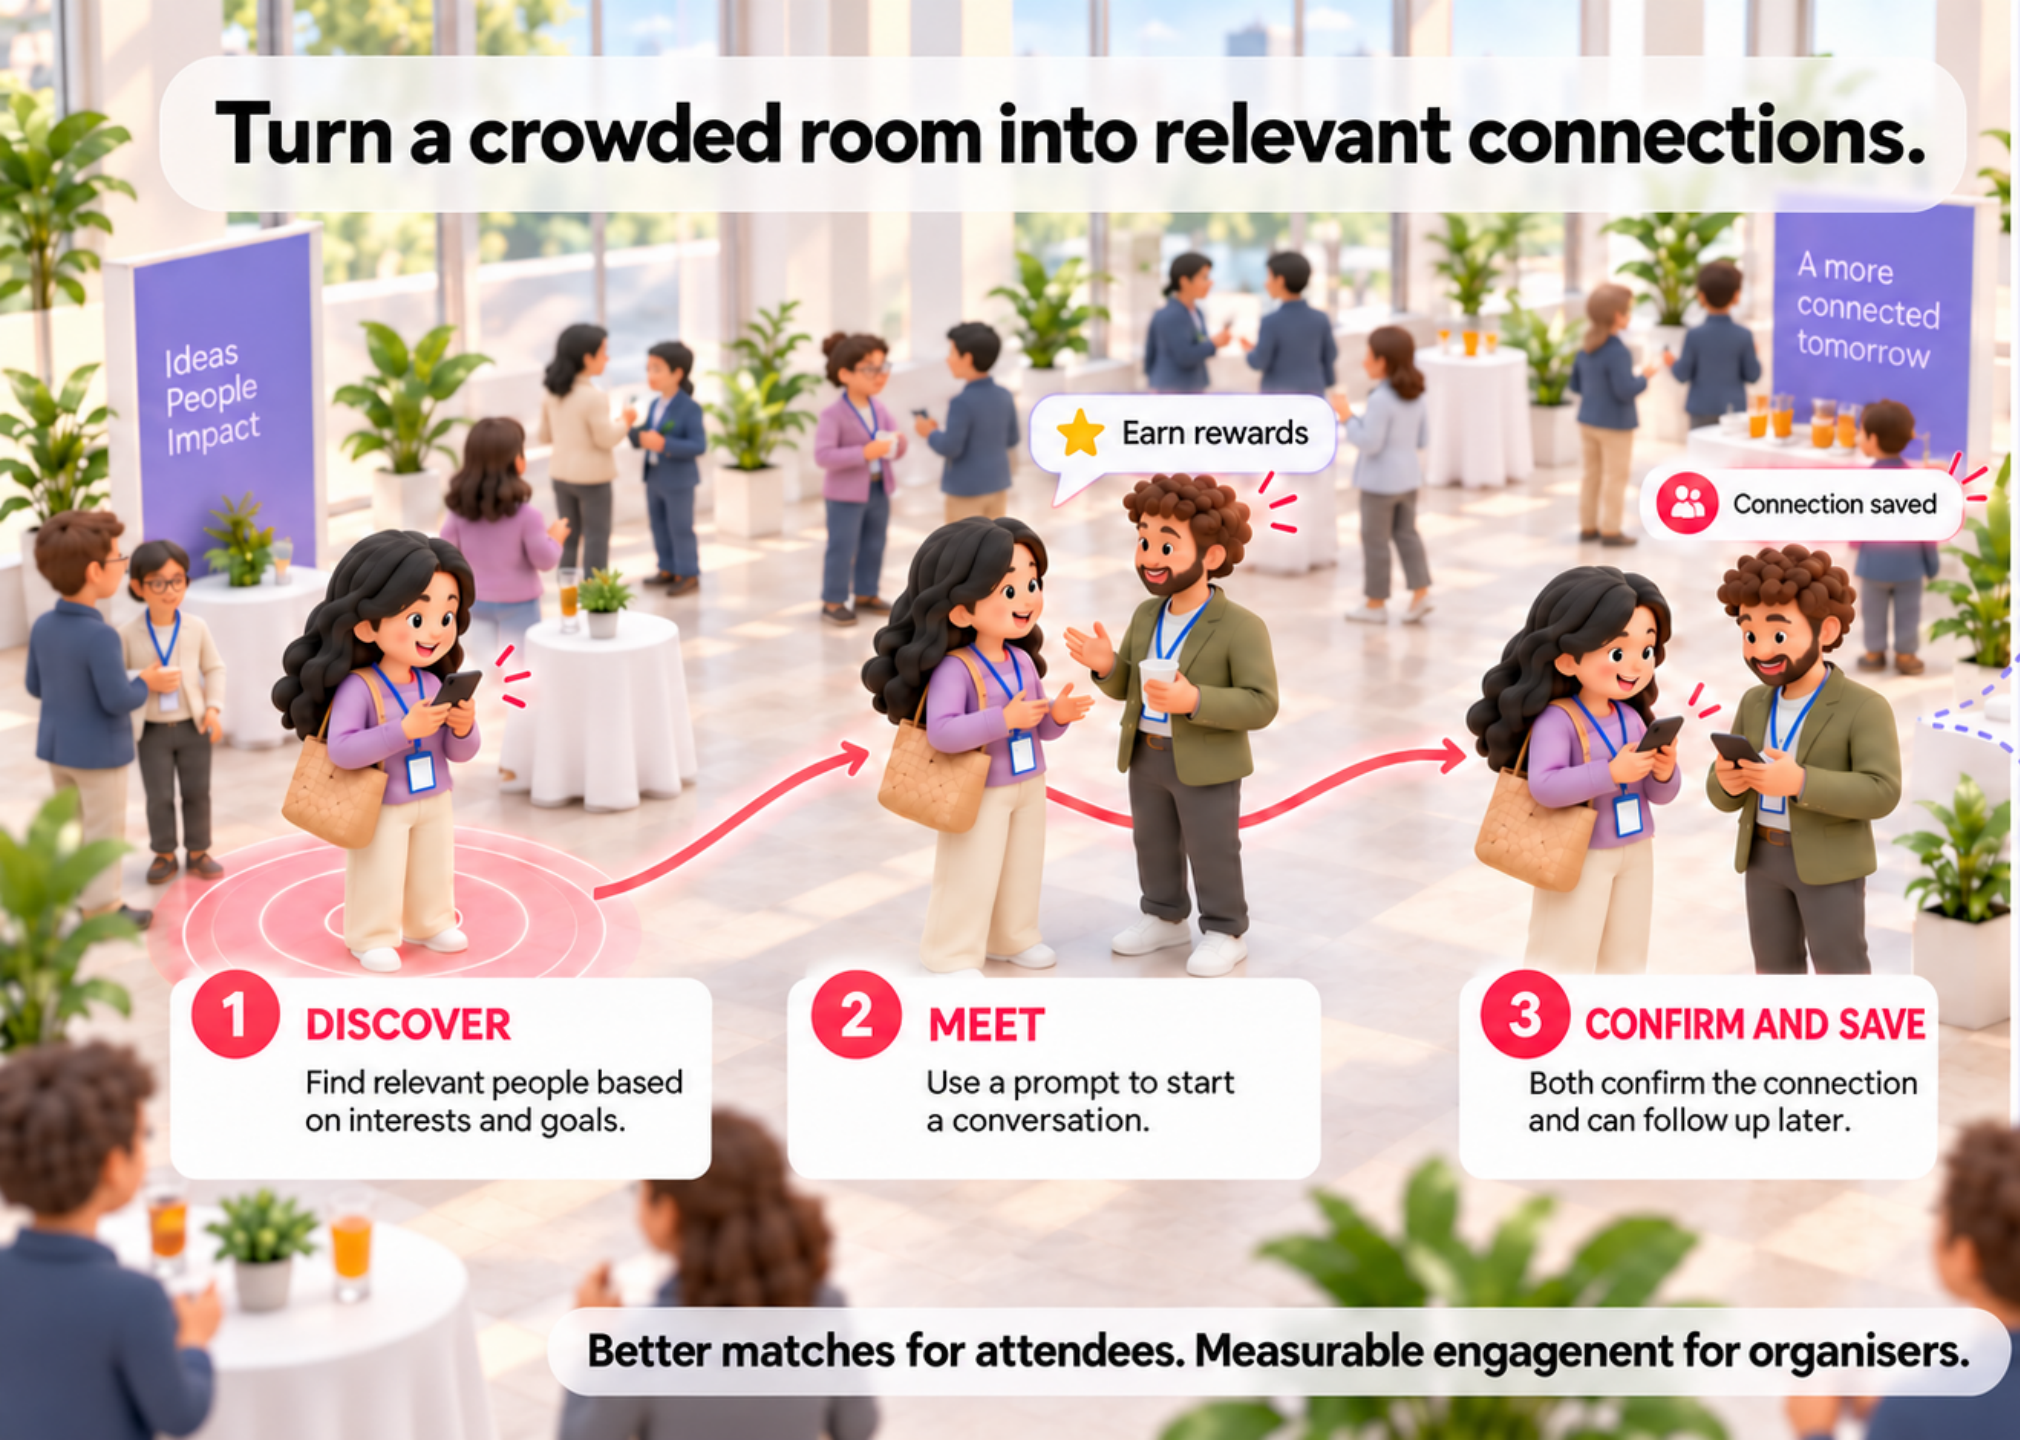
40%

of organisers still struggle to prove event ROI.

Attendees miss valuable connections. Organisers miss the data to understand and improve them.

Sources: Freeman Trends Report, 2025 · Bizzabo Event Networking Report, 2025 · Bizzabo State of Events Benchmark Report, 2026

Turn a crowded room into relevant connections.



1 DISCOVER
Find relevant people based on interests and goals.

2 MEET
Use a prompt to start a conversation.

3 CONFIRM AND SAVE
Both confirm the connection and can follow up later.

MEASURE
See participation and mutually confirmed connections.

IMPROVE
Use the results to improve the next event.

Better matches for attendees. Measurable engagenent for organisers.

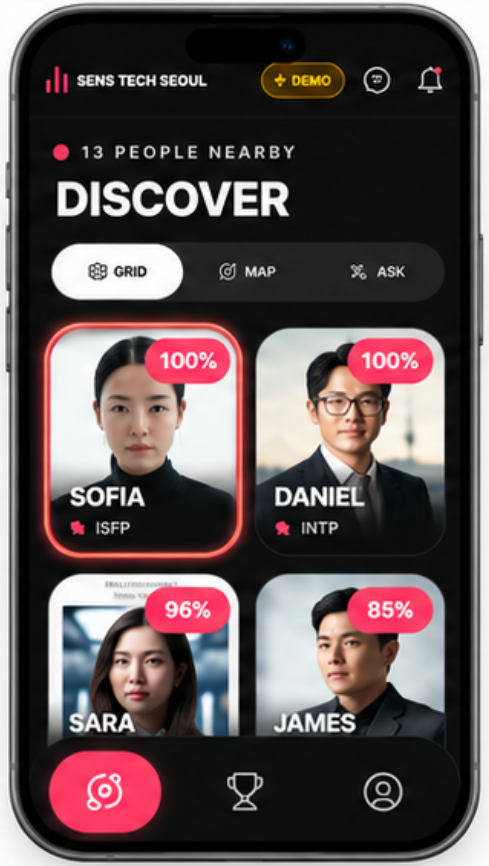
THE ATTENDEE EXPERIENCE

Find your people. Make the connection.

Discover relevant attendees, confirm you met and earn rewards.

Join through the event QR code and answer a few questions.

1 DISCOVER

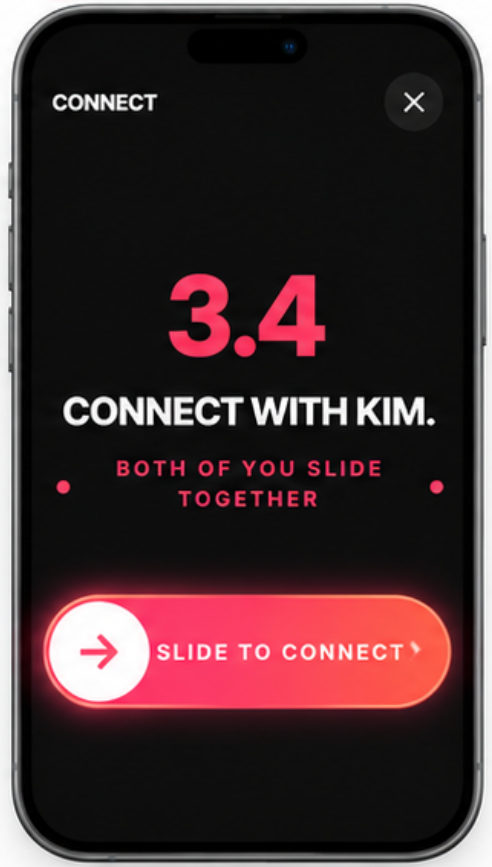


See your most relevant matches and compatibility scores.

2 EXPLORE

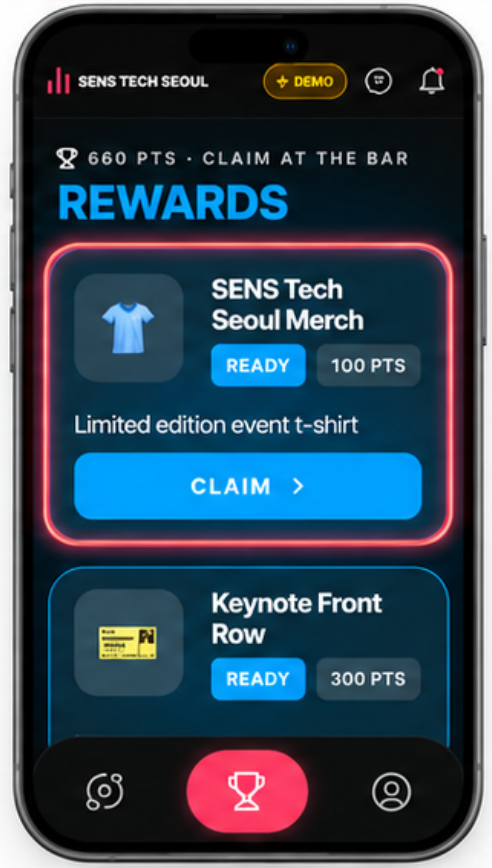
Explore the room's network and choose who to meet.

3 CONNECT



Meet in person, then both confirm the connection.

4 EARN REWARDS



Earn points and redeem available event rewards.

THE ORGANISER EXPERIENCE

Shape the experience. See what happened.

Set up a branded event, help attendees connect and measure the results.

1 DESCRIBE YOUR EVENT

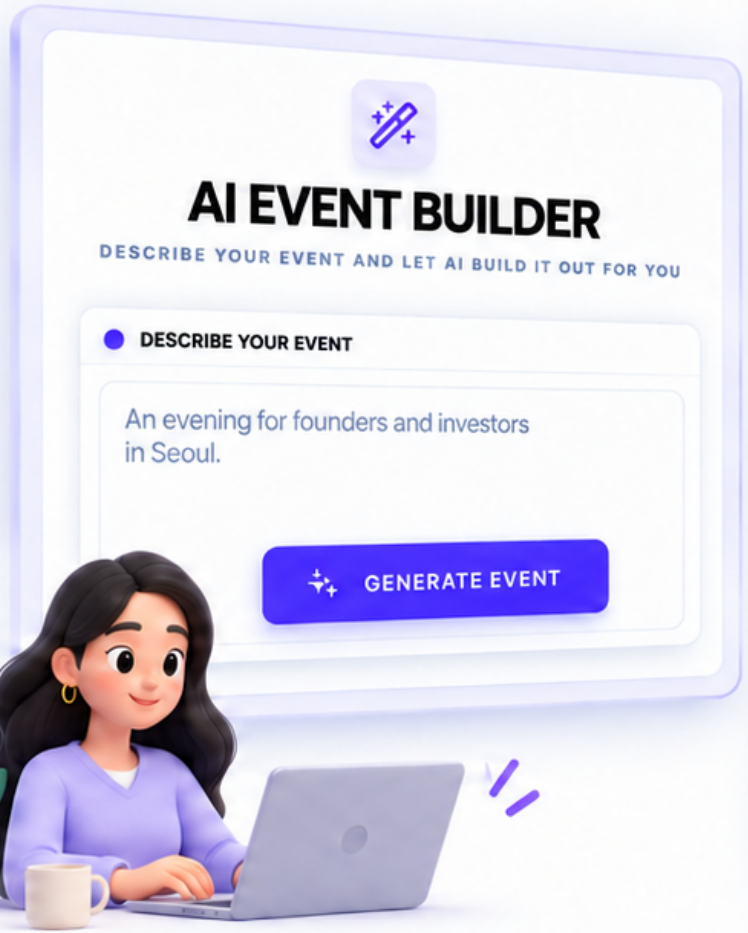
Tell SENS about your event, audience and goals.

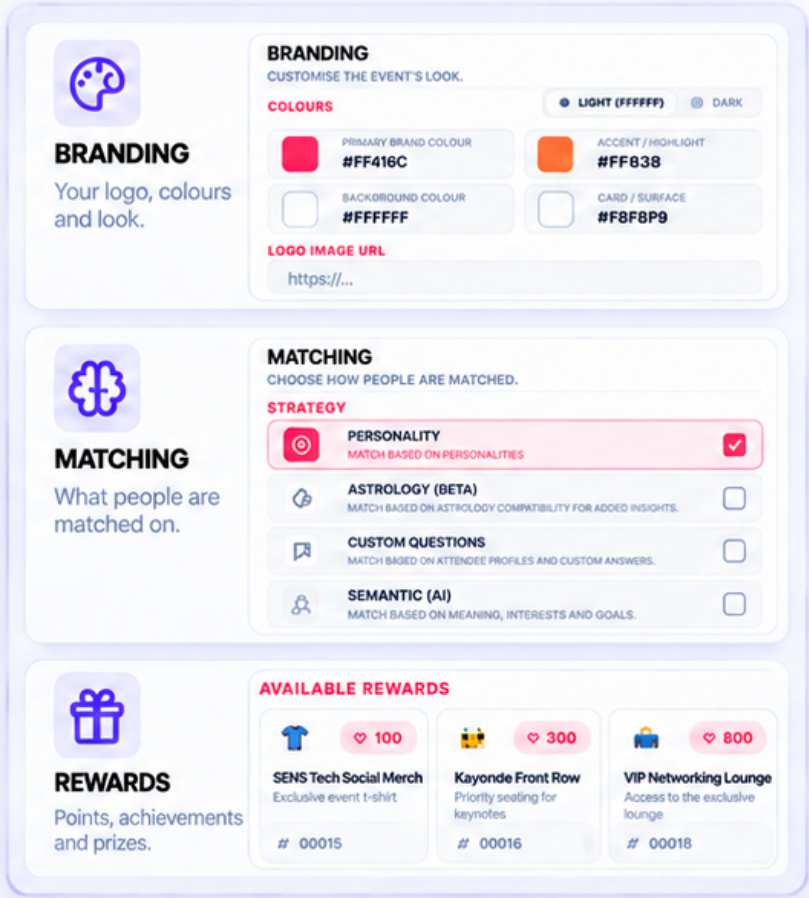
2 MAKE IT YOURS

Choose your branding, matching rules and rewards.

3 SEE WHAT HAPPENED

Track participation and confirmed connections.





Describe. Customise. Measure.

Demo screens and sample data

BLOCKCHAIN OPPORTUNITY

Real world connections. Rewards powered by your ecosystem.

SENS provides the networking experience. A proposed integration could connect its rewards to an existing blockchain.

SENS · THE ATTENDEE JOURNEY

1

JOIN
Open SENS and join an event.

2

CONNECT
Both attendees confirm they met.

3

EARN
Unlock rewards under organiser rules.

4

REDEEM
Use eligible rewards for event benefits.

PROPOSED · EXISTING BLOCKCHAIN INFRASTRUCTURE

Wallet connection
Connect with consent.

Authorised activity
SENS submits eligible claims.

Badges and tokens
Issue rewards under agreed rules.

Benefit redemption
Record when rewards are used.

BUILD ON YOUR ECOSYSTEM

Explore existing wallets, tokens and smart contracts. No new SENS token required.

Proposed integration. Network compatibility and reward rules require agreement. SENS records mutual confirmations, not independent proof of physical meetings. Personal contact details stay off chain.

TRACTION

We built SENS with every event we ran

16	~40	9.5 / 10	8+	100%
pilot events	attendees per event	average feedback rating	confirmed connections per guest	of respondents would attend again

16 pilot events with Meet Talk Play, a language exchange community in Korea.

We tested SENS with real attendees, watched how they used it and improved the platform from one event to the next, sometimes during the event itself.

TEST
We put working versions of SENS directly into attendees' hands.

LEARN
We watched where people engaged, where they hesitated and what helped them connect.

IMPROVE
We adjusted the matching, connection flow and rewards while the feedback was still fresh.

Each event became a live product lab.

Real attendees shaped the platform through real conversations, real connections and direct feedback.

> Hello Paul, this is Ade.
> It was great meeting you yesterday. I thought your app added a lot of value to the event and made networking much smoother. Even though I do not know MBTI well, I liked how you included that element, and I also liked the points feature because it encourages people to actually connect and follow up. I can see how this could be really useful for future events. Wishing you the best with the project, and I am looking forward to seeing the finished product.

> **Ade Balogun, M.Ed**
> University Professur

> Hey! It was great seeing you last Friday! Sens Ai was such a fresh experience it really kept that networking party from getting dull and felt like a fun game! I'd love to grab a coffee sometime if you're free.
> Let me know 😀

Ongoing pilot results. Ratings and attendance intentions come from post event feedback. Confirmed connections are recorded in SENS.

BUSINESS MODEL

We only price connections made at events

A usage based model built around the outcome networking is meant to create: people connecting.

TYPICAL EVENT METRICS

Registrations.
Attendance.
Badge scans.

Who showed up?

= 1 credit

1 connection confirmed by both attendees

THE SENS METRIC

Connections confirmed by both attendees.

Who connected?

$0.36–$0.60

per confirmed connection*

Create unlimited events. Buy credits. Top up as you grow.

Built around engagement. Measured in human connections.

FOR ORGANISERS

Link networking spend to measurable engagement you can report to sponsors.

FOR SENS

More connection activity drives demand for credits, aligning our growth with organiser engagement.

*Proposed USD rates, approximately $0.36–$0.60 per credit when purchased allowances are fully used. Each unique pair counts once per event. Credits are usage units, not crypto tokens.

TEAM AND DELIVERY

Product, community and experienced support.

Paul Conversy

Founder and Chief Executive Officer

Full time on SENS

Developed the current product and leads platform delivery and partnerships.

InsightMatches · Maker Studios · Dentsu

PART TIME COLLABORATORS · PROPOSED LEADERSHIP ROLES

Carlos Robles

Product strategy and delivery

Proposed role: Chief Product Officer

McKinsey · Origins Network

Raymond Ahn

Community growth and distribution

Proposed role: Chief Growth Officer

SocialRay · Korea Blockchain Week

Paul leads delivery, supported by product and community collaborators.
